Projects

SmartAcad | Academic Management Platform | HTML, CSS, JavaScript, Flask

Feb 2026 – March 2026

- Created a full-stack academic platform to effectively streamline student learning and resource access.
- Built a responsive and intuitive user interface ensuring seamless cross-device usability and experience.
- Integrated robust backend logic for efficient data handling and smooth feature functionality.
- Enhanced overall application performance while maintaining a clean, modular, and scalable code structure.
- Repository Link: <https://github.com/03Vin/SmartAcad.git>

MindDaily | Mental Health & Mood Tracker | Flutter, REST APIs

June 2025 – July 2025

- Developed a full-stack mental health tracking application featuring **Mood Logging**, daily **Affirmations**, and **Journaling**.
- Implemented **Real-time data visualization** with chart-based trend insights for identifying behavioural patterns.
- Engineered a custom notification engine using **Flutter Local Notifications** for personalized user engagement.
- Repository Link: <https://github.com/03Vin/MindDaily.git>

She Shield | Women's Safety Monitoring System | Flask, Python

April 2025 – May 2025

- Designed a community-driven safety platform facilitating real-time **Incident Reporting** and campus-wide safety updates.
- Developed core features including location-based **Mapping**, **Category Tagging**, and moderated discussion spaces.
- Strengthened campus security by providing actionable safety insights for students and university authorities.
